

ANIL KUMAR DEVALNDA

Senior DevOps Engineer | SRE | Kubernetes | Terraform | CI/CD | Cloud Infrastructure | Platform Engineering
Toronto, ON, Canada | Phone: 437-663-4554 | Email: anilkumardevandla21@gmail.com | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior Platform Engineer with 7+ years of experience designing, automating, and operating enterprise-scale cloud infrastructure, CI/CD platforms, and Kubernetes environments. Proven expertise in building developer platforms, GitOps workflows, reusable deployment patterns, and infrastructure automation that accelerate engineering productivity. Strong hands-on experience with Azure, Kubernetes (AKS), Terraform, Jenkins, GitHub Actions, Helm, and distributed systems. Skilled at building reliable, secure, and scalable platforms that enable engineering teams to deliver software efficiently. Passionate about AI-assisted development, self-service tooling, platform reliability, and operational excellence.

TECHNICAL SKILLS

CI/CD Platform Engineering

Jenkins Administration, GitHub Actions, Reusable Workflows, Self-Hosted Runner Concepts, CI/CD Platforms, Pipeline Automation, Release Engineering, Golden Paths, Self-Service Tooling

Platform Engineering & GitOps

Platform Engineering, Internal Developer Platforms (IDP), GitOps, ArgoCD, ApplicationSets, Helm, Infrastructure Automation, Developer Experience (DevEx)

Cloud Platforms

Microsoft Azure, Amazon Web Services (AWS), Google Cloud Platform (GCP - Exposure), Hybrid Cloud Architecture, Multi-Cloud Infrastructure

Kubernetes & Container Orchestration

Kubernetes (AKS), Docker, Helm, Kubernetes Workload Identity, Gateway API, StatefulSets, Deployments, Services, Namespace Management, Cluster Troubleshooting

Infrastructure as Code

Terraform, ARM Templates, Infrastructure as Code (IaC)

Programming & Automation

Python, Bash, PowerShell, YAML, JSON

Monitoring & Observability

Prometheus, Grafana, Azure Monitor, Datadog Concepts, Elasticsearch, Log Analytics, Alerting, Incident Response, Root Cause Analysis, Runbooks

Security & Identity

Azure Key Vault, RBAC, IAM Concepts, Secrets Management, TLS/SSL, Access Control, Workload Identity

AI & Modern Engineering

AI-Assisted Development, LLM Concepts, AI Developer Tooling, Automation Workflows

Data Platform & SRE

Site Reliability Engineering (SRE), Data Platform Infrastructure, Event-Driven Architecture, Reliability Engineering, Cloud Cost Optimization, Infrastructure Monitoring

Cloud & Kubernetes

AWS (Exposure), GCP (Exposure), Kubernetes (AKS), EKS (Exposure), GKE (Exposure), Helm, GitOps

DevOps Tooling

Terraform, Jenkins, ArgoCD, GitHub Actions, CI/CD Pipelines, Python Automation

Observability

Prometheus, Grafana, Datadog (Exposure), Alerting, Incident Response, Root Cause Analysis

PROFESSIONAL EXPERIENCE

Kyndryl | Toronto, ON

Platform Engineer

April 2026 – Present

- Designed and operated Kubernetes-based platform infrastructure supporting enterprise middleware and distributed applications.
- Built reusable CI/CD workflows and deployment automation using GitHub Actions, Azure DevOps, Jenkins, and Infrastructure as Code practices.
- Implemented GitOps deployment patterns using ArgoCD and standardized Helm-based deployment templates.
- Created self-service deployment capabilities and reusable infrastructure components to improve developer productivity.
- Managed highly available middleware platforms including RabbitMQ, ActiveMQ Artemis, Couchbase, MinIO, and Memcached.
- Implemented observability solutions using Prometheus, Grafana, Azure Monitor, and Log Analytics.

- Automated infrastructure provisioning, secrets management, and workload identity integrations using Terraform and Azure Key Vault.
- Collaborated with development, architecture, and security teams to establish platform standards, golden paths, and operational best practices.
- Improved platform reliability through incident response, root cause analysis, monitoring, and proactive infrastructure optimization.
- Leveraged AI-assisted development tools to accelerate scripting, troubleshooting, documentation, and platform engineering activities.

First National Financial | Toronto, ON

Azure Cloud Infrastructure Engineer

February 2023 – April 2026

- Designed and maintained Kubernetes-based cloud platforms supporting application modernization initiatives and developer enablement.
- Built reusable CI/CD pipelines and standardized deployment patterns to accelerate software delivery across multiple environments.
- Collaborated with development teams to implement self-service infrastructure and streamline deployment workflows.
- Managed Kubernetes resources including namespaces, ingress configurations, secrets, ConfigMaps, and workload identity integrations.
- Implemented GitOps deployment patterns and automated infrastructure provisioning using Infrastructure as Code (Terraform).
- Improved developer experience by creating reusable deployment templates, operational runbooks, and standardized infrastructure components.
- Implemented observability solutions using Azure Monitor, Prometheus, Grafana, Elasticsearch, and Log Analytics.
- Supported production environments by troubleshooting incidents, improving reliability, and reducing operational toil.
- Implemented backup and disaster recovery strategies using Velero.
- Partnered with engineering teams to build scalable, secure, and cloud-native infrastructure platforms.

ADP | Chennai, India

DevOps Engineer / Azure Engineer

October 2019 – February 2023

- Administered Linux servers (RHEL and Ubuntu), including user management, package management, system hardening, and troubleshooting.
- Managed Windows Server environments, including IIS hosting, services, and application deployments.
- Troubleshot Linux/Unix servers and application infrastructure, resolving system issues and improving stability.
- Provided hands-on support for cloud storage, backup automation, and efficient use of object storage.
- Monitored web and mobile applications, maintaining system performance and uptime.
- Collaborated with cross-functional teams to improve operational efficiency, documentation, and knowledge transfer.

Gemini Consulting | Odisha, India

Software Engineer

December 2017 – October 2019

- Administered Linux and Unix servers, performing installation, configuration, and monitoring.
- Configured Nagios monitoring and alerting for infrastructure performance management.
- Implemented AWS infrastructure solutions including EC2, Auto Scaling, and Load Balancers.
- Maintained system security using firewall configurations and compliance monitoring tools.
- Collaborated with cross-functional teams and communicated project updates to stakeholders to ensure successful delivery.

EDUCATION

Master of Science in Agile Project Management

Northeastern University, Toronto, Canada

Bachelor of Technology in Computer Science

Acharya Nagarjuna University, Andhra Pradesh, India

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
- Microsoft Azure Administrator Associate
- Certified Kubernetes Administrator (CKA)
